Laser Hair Removal

Laser Hair Removal is the most effective treatment to remove unwanted hair.

The Gentlelase is Candela's premier hair removal laser, treating quickly, comfortably and effectively. The Laser works by creating a beam of high intensity light that penetrates deeply into the skin tissue where it delivers a controlled amount of therapeutic heat. Candela's patented Dynamic Cooling Device technology protects the upper layers of your skin with a cooling burst of cryogen to maximize patient safety and comfort.

It is medically proven that this device gives you permanent hair reduction. The FDA defines it as long term stable reduction in the number of hairs re-growing after a treatment regime.

- The laser machine only works on brown or black hair NOT blonde, grey or red
- The laser only works on white skin. Laser can cause pigmentation on darker skin types

Courses can be paid in 1 or 2 instalments. Consultation* & Patch test is required.

*Consultations cost €20, this is refundable against your first session or course.
